

Computer Science

Year 10

Year 11

Term 1

Ethical, Legal, cultural and environmental impacts of digital technology

Term 2

Systems architecture and memory and storage

Term 3

Computer networks, connections and protocols

Term 4

Algorithms

Term 5

Fundamentals of programming

Term 6

Programming project

Term 1

Producing robust programs

Term 2

Systems software

Term 3

Network security

Term 4

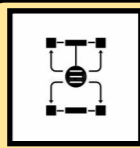

Boolean Logic

Term 5

Programming languages and integrated development environments

Key

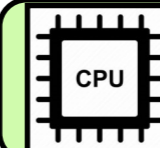

Concepts

Algorithms

Data Representation

Hardware and Processing

Programming

Information Technology

Communication and networks
