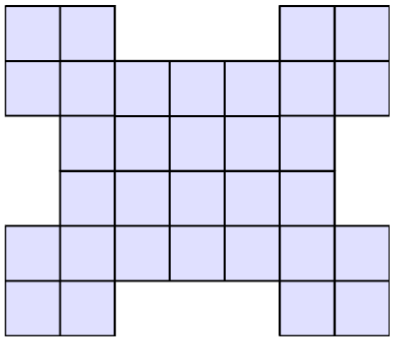
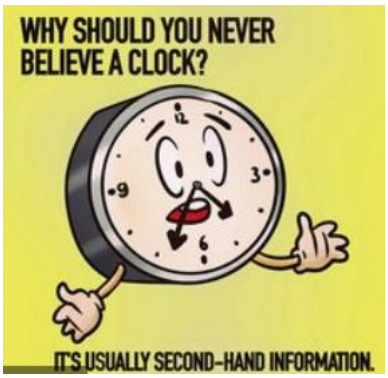
How many squares can you see in this pattern?



This is not as easy as it looks. You need to sound all the single squares, then the 2x2, then 3x3, then 4x4 you should get

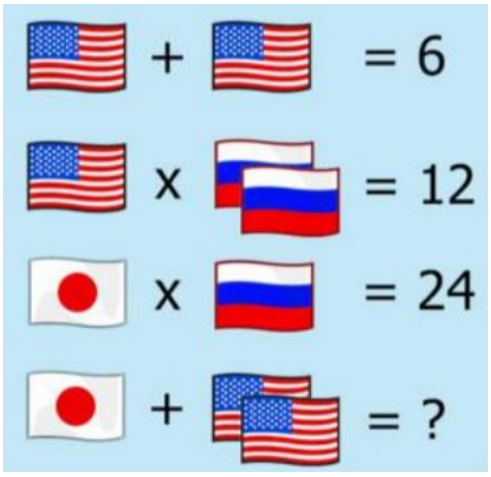
52 squares!

19. How Many Squares?
28 @ 1×1, 16 @ 2×2, 6 @ 3×3, 2 @ 4×4.
Total: 52



If the original price was £2.59 half of that would be £1.29 ½ pence!

It is a bargain to buy them at £1



The USA flag is worth 3 because 3 add 3 = 6

Watch the sign.

3 x something = 12

Russia = 2. Becareful 2 flags = 4 therefore 1 flag = 2

Japan x Russia = 24

Japan = 12 because 12 x 2 =24

Japan add 2 USA = 12 +3 +3 = 18
