

Ace Your Exams: Topics for Revision 2022

My key actions/areas of focus are:**English: Poetry**

Lord Byron	When We Two Parted
Percy Bysshe Shelley	Love's Philosophy
Robert Browning	Porphyria's Lover
Elizabeth Barrett Browning	Sonnet 29 – 'I think of thee!'
Thomas Hardy	Neutral Tones
Charlotte Mew	The Farmer's Bride
C Day Lewis	Walking Away
Maura Dooley	Letters From Yorkshire
Charles Causley	Eden Rock
Seamus Heaney	Follower
Simon Armitage	Mother, any distance
Carol Ann Duffy	Before You Were Mine
Owen Sheers	Winter Swans
Daljit Nagra	Singh Song!
Andrew Waterhouse	Climbing My Grandfather

English: Macbeth

Context	Main Characters	Themes
<ul style="list-style-type: none">Shakespeare's TimeThe Divine Right of KingsWitches and the SupernaturalJames IThe Role of WomenHealthcare and Medicine	<ul style="list-style-type: none">MacbethDuncanThe Three WitchesLady MacbethMacduffBanquo	<ul style="list-style-type: none">Unchecked AmbitionFate vs Free WillGender, Masculinity and FemininityInversion of the Natural OrderRelationships

English: An Inspector Calls

Context	Main Characters	Themes
<ul style="list-style-type: none"> J.B. Priestley Pre and Post-War Realism and Postmodernism Socialism Social and Moral Responsibility The Titanic 	<ul style="list-style-type: none"> Arthur Birling Sybil Birling Sheila Birling Eric Birling The Inspector Gerald Croft Eva Smith/Daisy Renton 	<ul style="list-style-type: none"> Responsibility Guilt Age Class Gender The supernatural Society

MATHS

Maths: Foundation Paper 1 (non-calc)

Q	Topic	Hegarty
1	Adding negative numbers	41
2	Bar charts & mode	425
3	Subtraction with decimal numbers	47
4	Parts of the circle	592
5	Multiplication	21, 144
6	Direct proportion	341
7	Compound units	340, 738
8	Frequency trees	368
9	Comparing fractions	60
10	Factors of a number	27
11 a	Probability of single events	351, 353
11 b	Compare positive integers	14
12	Add fractions (same denominator)	65
13	Order of operations	24
14	Linear sequences (nth term)	198
15	Angle facts, quadrilaterals	486, 824
16	Ratio problem solving	336
17 a	Find percentages of amounts	86
17 b	Fractions of an amount	77
18	Rotational symmetry, Venn diagrams	824, 828, 327
19	Substitution	781
20	Solve 2-step linear equations	179
21	Probability of more than one event	359
22 a	Drawing quadratic graphs from a table	251
22 b	Drawing quadratic graphs from a table	251
22 c	Estimating a surd value	112
23 a	Expand a single bracket & simplify	160, 161
23 b	Expand a single bracket	160
23 c	Direct algebraic proof	325
24	Exact values of sine, cosine & tangent	306, 845
25	Dividing fractions	70
26	Speed from a distance-time graph	876
27 a	Interpreting data from a table	339
27 b	Direct proportion	
27 c	Making conclusions using data	

Maths: Foundation Paper 2 (calc)

Q	Topic	Hegarty
1	Converting metric units (length)	692
2	Pie charts	427
3	Line symmetry	827
4	Convert between decimals & fractions	52, 74
5 a	Solve 1-step linear equations	178
5 b	Solve 1-step linear equations	178
6	Scale diagrams	867
7	Addition & subtraction (word problem)	20
8	Profit	759
9 a	Vertical line graphs & range	425, 414
9 b	Vertical line graphs & median	425, 416
9 c	Find percentages of amounts	87
10 a	Probability of single events	351
10 b	Probability of single events	351
10 c	Expectation	355
11	Cube numbers	100
12	Converting time	710
13	Area of a square & fraction of a number	554, 77
14 a	Sequences, using term-to-term rule	197
14 b		
15	Describe transformations	653
16	Compound measure & direct proportion	738, 341
17	Scale diagrams	865
18	Mean	405
19 a	Write ratios as fractions	330
19 b	Write ratios in the form 1:n or n:1	331
20	Translating shapes	638
21	Error intervals	774
22	Prime numbers, substitution	28, 783
23	Simultaneous equations (in context)	195
24 a	Time series charts	450
24 b		
25	Percentage decrease (repeated)	95
26	Turning point of quadratic graph	255
27	Circumference problem solving	538

28		Interior angles in polygons	561
29		Square & cube roots	101
30		Percentage change	97
31		Solving quadratic equations (factorising)	230

28		Solve single linear inequalities	270
29		Right-angled trigonometry (angles)	511

Maths: Higher Paper 1 (non-calc)

Q		Topic	Hegarty
1		Laws of indices (power of a power)	107
2		Volume of a cylinder	573
3		Simplifying expressions	156, 158
4		Exact values of sine, cosine & tangent	306, 845
5		Dividing fractions	70
6		Speed from a distance-time graph	876
7		Interior angles in polygons	561
8	a	Interpreting data from a table	23
8	b	Multiplication (worded problems)	
8	c	Conclusions using data from a table	
9		Square & cube roots problem solving	101
10		Percentage change	97
11		Congruent triangles	682
12		Solving quadratic equations	230
13		Ratio problem solving	336
14		Venn diagrams for probability	387
15	a	Comparing box plots	436
15	b		
16		Estimate calculations	131
17		Negative indices	104
18		Inverse proportion	342
19	a	Simultaneous equations (in context)	195
19	b		
20		Circle theorems	595, 596
21		Nth term of a quadratic sequence	248
22		Quadratic equations from fractions	244
23		Area & volume of similar shapes	617, 621
24		Surds (operations, rationalising)	118, 115
25		Quadratic graphs	252, 253
26		Area of a triangle & cosine rule	518, 527
27	a	Cosine graphs	304
27	b		

Maths: Higher Paper 2 (calc)

Q		Topic	Hegarty
1		Translating shapes with a vector	638
2		Converting length (worded problems)	694
3		Linear sequences (nth term)	198
4		Lowest common multiple	34
5		Error intervals	774
6	a	Time series charts	450
6	b		
7		Prime numbers, substitution	28, 783
8		Depreciation (repeated)	95
9		Circumference problem solving	538
10		Solve single linear inequalities	270
11		Right-angled trigonometry (angles)	511
12		Cubic graphs	298
13		Expectation	355
14		Mean	406
15		Surface area & problem solving	586, 589
16		Probability of single events	351, 352
17		Indices with algebraic expressions	173, 174
18		Histograms	446
19		Find the upper bound of a calculation	139, 777
20		Graphs transformations f(-x)	312
21		Speed (problem solving)	723
22	a	Iteration	322
22	b		
23		Similar triangles, Pythagoras' theorem	612, 501
24		Volume (problem solving), ratio	328, 583
25		Invariance	655
26		Inverse functions	296
27	a	Simultaneous equations (circles & straight lines)	318, 225
27	b		
28		Gradient on a quadratic graph	204, 255

SCIENCE:

Biology

B1 Cell Biology	Trilogy and Triple	Triple only
Cell structure	<ul style="list-style-type: none"> Eukaryotes – animal and plant cells, prokaryotes – bacterial cells. Cell specialisation and differentiation Microscopy and required practical 	<ul style="list-style-type: none"> Culturing micro organisms Required practical
Cell division	<ul style="list-style-type: none"> Chromosomes 	

	<ul style="list-style-type: none"> • Mitosis and the cell cycle • Stem cells 	
Transport in cells	<ul style="list-style-type: none"> • Diffusion • Osmosis and required practical • Active transport 	
B2 Organisation	Trilogy and Triple	Triple only
Principles of organisation	<ul style="list-style-type: none"> • Cells, tissues and organs 	
Animal tissues, organs and organ systems	<ul style="list-style-type: none"> • Human Digestive System • Required practical – qualitative reagents (food tests) • Required practical – effect of pH on enzymes • The Heart • Blood • Coronary Heart Disease • Health/lifestyle choices • Cancer 	
Plant tissues, organs and systems	<ul style="list-style-type: none"> • Plant tissue • Xylem/Phloem • Transpiration/Translation 	
B3 Infection and response	Trilogy and Triple	Triple only
Communicable diseases	<ul style="list-style-type: none"> • Communicable diseases • Viral diseases • Bacterial disease • Fungal diseases • Protist diseases • Human defence systems • Vaccinations • Antibiotics and painkillers • Discovery and development of drugs 	<ul style="list-style-type: none"> • Production and use of Monoclonal antibodies • Plant disease – detection and identification • Plant defence response
B4 Bioenergetics	Trilogy and Triple	Triple only
Photosynthesis	<ul style="list-style-type: none"> • Photosynthetic reactions • Rate of Photosynthesis • Required practical – Photosynthesis • Use of Glucose from Photosynthesis 	
Respiration	<ul style="list-style-type: none"> • Aerobic and Anaerobic respiration • Response to exercise • Metabolism 	
B5 Homeostasis and Response	Trilogy and Triple	Triple only
Homeostasis	<ul style="list-style-type: none"> • Homeostasis 	<ul style="list-style-type: none"> • Control of body temperature
The Human Nervous System	<ul style="list-style-type: none"> • Structure and function • Required practical – Reaction times 	<ul style="list-style-type: none"> • The Brain • The Eye
Hormonal coordination in humans	<ul style="list-style-type: none"> • Human endocrine system • Control of blood glucose concentration • Hormones in human reproduction • Contraception • Use of hormone to control infertility (HT) • Negative feedback (HT) 	<ul style="list-style-type: none"> • Maintaining water and nitrogen balance in the body
Plant hormones		<ul style="list-style-type: none"> • Control and coordination • Required practical – light/gravity on the growth of seedlings

		<ul style="list-style-type: none"> • Use of plant hormones
B6 Inheritance	Trilogy and Triple	Triple only
Reproduction	<ul style="list-style-type: none"> • Sexual and asexual reproduction • Meiosis • DNA and the genome • Genetic inheritance • Inherited disorders • Sex determination 	<ul style="list-style-type: none"> • Advantages and disadvantages of sexual and asexual reproduction • DNA structure
Variation and evolution	<ul style="list-style-type: none"> • Variation • Evolution • Selective Breeding • Genetic engineering • Evidence of evolution • Fossils • Extinction • Resistant bacteria • Classification of living organisms 	<ul style="list-style-type: none"> • Cloning • Theory of Evolution • Speciation • The understanding of genetics
B7 Ecology	Trilogy and Triple	Triple only
Adaptations, interdependence and competition	<ul style="list-style-type: none"> • Communities • Abiotic factors • Biotic factors • Adaptations 	
Organisation of an ecosystem	<ul style="list-style-type: none"> • Levels of organisation • How materials are cycled 	<ul style="list-style-type: none"> • Decomposition • Required practical – temperature and the rate of decay • Impact of environmental change
Biodiversity and the impact on humans	<ul style="list-style-type: none"> • Biodiversity • Waste management • Land use • Deforestation • Global Warming • Maintaining biodiversity 	
Trophic levels in an ecosystem		<ul style="list-style-type: none"> • Trophic levels • Pyramid of biomass • Transfer of biomass
Food production		<ul style="list-style-type: none"> • Factors affecting food security • Farming techniques • Sustainable fisheries • Role of biotechnology

Chemistry		
C1 Atomic Structure and the Periodic Table	Trilogy and Triple	Triple only
The Atom	<ul style="list-style-type: none"> • Atoms, elements and compounds • Mixtures • The development of the atom • Subatomic particles • Size and mass of atoms • Relative atomic mass • Electronic Structure 	
The Periodic Table	<ul style="list-style-type: none"> • The Periodic Table • Development of the Periodic Table • Metals and non-metals • Group 0 • Group 1 	

	<ul style="list-style-type: none"> Group 7 	
Properties of Transition metals		<ul style="list-style-type: none"> Comparisons with Group 1 elements Typical properties
C2 Bonding and Structure	Trilogy and Triple	Triple only
Chemical bonds	<ul style="list-style-type: none"> Chemical bonds Ionic bonding Ionic compounds Covalent bonding Metallic bonding 	
Properties of substances	<ul style="list-style-type: none"> Three states of matter State symbols Properties of ionic compounds Properties of small molecules Polymers Giant covalent structures Properties of metals and alloy Metals as conductors 	
Structure and bonding of Carbon	<ul style="list-style-type: none"> Diamond Graphite Graphene and Fullerenes 	
Bulk and surface properties of matter including nanoparticles		<ul style="list-style-type: none"> Size of particles and their properties Uses of nanoparticles
C3 Quantitative Chemistry	Trilogy and Triple	Triple only
Chemical measurements	<ul style="list-style-type: none"> Conservation of mass Balancing equations Relative formula mass Mass changes when a gas is released Chemical measurements 	
Use of amount of substance in relation to masses of pure substances	<ul style="list-style-type: none"> Moles (HT) Amounts of substances in equations (HT) Using moles to balance equations (HT) Limiting reactants (HT) Concentration of solutions 	
Yield and atom economy of chemical reactions		<ul style="list-style-type: none"> Percentage Yield Atom economy Using concentration of solutions in mol/dm³ Use of amounts of substance in relation to gases
C4 Chemical changes	Trilogy and Triple	Triple only
Reactivity of metals	<ul style="list-style-type: none"> Metal Oxides The reactivity series Extraction of metals and reduction Oxidation and Reduction in terms of electrons (HT) 	
Reaction of acids	<ul style="list-style-type: none"> Reaction of acids with metals Neutralisation of acids and salt production Soluble salts – required practical, preparation of a pure dry salt The pH scale and neutralisation Strong and weak acids 	<ul style="list-style-type: none"> Titration – required practical included
Electrolysis	<ul style="list-style-type: none"> The process of electrolysis 	

	<ul style="list-style-type: none"> Electrolysis of molten ionic compounds Extracting metals using electrolysis Electrolysis of aqueous solutions – required practical Half equations (HT) 	
C5 Energy Changes	Trilogy and Triple	Triple only
Exothermic/Endothermic reactions	<ul style="list-style-type: none"> Energy transfer during exothermic and endothermic reactions – required practical included. Reaction profiles The energy change of reactions (HT) 	
Chemical cells and fuel cells		<ul style="list-style-type: none"> Cells and batteries Fuel cells
C6 The rate and extent of chemical change	Trilogy and Triple	Triple only
Rate of reaction	<ul style="list-style-type: none"> Calculating rates of reaction Factors which affect the rates of chemical reactions- required practical included Collision theory and activation energy Catalysts 	
Reversible reactions and dynamic equilibrium	<ul style="list-style-type: none"> Reversible reactions Energy changes and reversible reactions Equilibrium The effect of changing conditions of equilibrium (HT) The effect of changing concentration (HT) The effect of changing temperature on equilibrium (HT) The effect of changing pressure on equilibrium (HT) 	
C7 Organic Chemistry	Trilogy and Triple	Triple only
Carbon compounds as fuels and feedstock	<ul style="list-style-type: none"> Crude oil, hydrocarbons and alkanes Fractional distillation and petrochemicals Properties of hydrocarbons Cracking and alkenes 	
Reactions of alkenes and alcohols		<ul style="list-style-type: none"> Structure and formulae of alkenes Reactions of alkenes Alcohols Carboxylic acid
Synthetic and naturally occurring polymers		<ul style="list-style-type: none"> Addition polymerisation Condensation polymerisation Amino acids DNA and other naturally occurring polymers
C8 Chemical analysis	Trilogy and Triple	Triple only
Purity, formulations and chromatography	<ul style="list-style-type: none"> Pure substances Formulations Chromatography 	
Identification of common gases	<ul style="list-style-type: none"> Test for Hydrogen Test for Oxygen Test for Carbon Dioxide 	

Identification of ions by chemical and spectroscopic means		<ul style="list-style-type: none"> • Flame tests • Metal hydroxides • Carbonates • Halides • Sulfates • Required prac – chemical tests • Instrumental methods • Flame emission spectroscopy
C9 Chemistry of the atmosphere	Trilogy and Triple	Triple only
Composition of the Earth's atmosphere	<ul style="list-style-type: none"> • The proportions of different gases in the atmosphere • The Earth's early atmosphere • How Oxygen/Nitrogen increased • How Carbon Dioxide decreased 	
Carbon Dioxide and Methane as a greenhouse gases	<ul style="list-style-type: none"> • Greenhouse gases • Human activities which contribute to an increase in greenhouse gases in the atmosphere • Global Climate Change • The Carbon Footprint and its reduction 	
Common Atmospheric Pollutants and their sources	<ul style="list-style-type: none"> • Atmospheric pollutants from fuels • Properties and effects of atmospheric pollutants 	
C10 Using resources	Trilogy and Triple	Triple only
Using the Earth's resources and obtaining potable water	<ul style="list-style-type: none"> • Using the Earth's resources and sustainable development • Potable water – including required practical • Waste Water Treatment • Alternative methods of extracting water (HT) 	
Life cycle assessment and recycling	<ul style="list-style-type: none"> • Life cycle assessments • Ways of reducing the use of resources 	
Using materials		<ul style="list-style-type: none"> • Corrosion and its prevention • Alloys as useful materials • Ceramics, polymers and composites
The Haber process and the use of NPK fertilisers		<ul style="list-style-type: none"> • The Haber process • Production and uses of NPK fertilisers

Physics		
P1 Energy	Trilogy and Triple	Triple only
Energy changes in a system, and the ways energy is stored before and after such changes.	<ul style="list-style-type: none"> • Energy stores and systems • Changes in energy • Energy changes in systems – including specific heat capacity required practical • Power 	
Conservation and dissipation of energy	<ul style="list-style-type: none"> • Energy transfers in a system • Efficiency • National and global energy resources 	<ul style="list-style-type: none"> • Required practical – investigating the effectiveness of different materials as thermal insulators.
P2 Electricity	Trilogy and Triple	Triple only
Current, potential difference and resistance	<ul style="list-style-type: none"> • Standard circuit diagram symbols • Electrical charge and current 	

	<ul style="list-style-type: none"> • Current, resistance and potential difference • Required practical – investigating resistance • Resistors – including required practical I/V graphs • Series and parallel circuits 	
Domestic uses and safety	<ul style="list-style-type: none"> • Direct and alternating potential difference • Mains electricity 	
Energy transfers	<ul style="list-style-type: none"> • Power • Energy transfers in everyday appliances • The National Grid 	
Static Electricity		<ul style="list-style-type: none"> • Static charge • Electric fields
P3 Particle model of matter	Trilogy and Triple	Triple only
Changes of state and the particle model	<ul style="list-style-type: none"> • Density of materials • Density required practical • Changes of state 	
Internal energy and energy transfers	<ul style="list-style-type: none"> • Internal energy • Temperature changes in a system and specific heat capacity • Changes of heat and specific latent heat 	
Particle model	<ul style="list-style-type: none"> • Particle motion in gases 	<ul style="list-style-type: none"> • Pressure in gases • Increasing the pressure of a gas
P4 Atomic Structure	Trilogy and Triple	Triple only
Atoms and isotopes	<ul style="list-style-type: none"> • The structure of an atom • Mass number, atomic number and isotopes • Development of the model of the atom 	
Atoms and nuclear radiation	<ul style="list-style-type: none"> • Radioactive decay and nuclear radiation • Nuclear Equations • Half-life and the random nature of radioactive decay • Radioactive contamination 	
Hazards and uses of radioactive emissions and the background radiation		<ul style="list-style-type: none"> • Background radiation • Different half-lives of radioactive isotopes • Uses of nuclear radiation
Nuclear fission and fusion		<ul style="list-style-type: none"> • Nuclear fission • Nuclear fusion
P5 Forces	Trilogy and Triple	Triple only
Forces and their interactions	<ul style="list-style-type: none"> • Scalar and vector quantities • Contact and non-contact forces • Gravity • Resultant forces • Work done and energy transfer • Forces and electricity • Required practical – force and extension of a spring 	Moments, levers and gears
Pressure and pressure differences in fluids		<ul style="list-style-type: none"> • Pressure in a fluid • Atmospheric pressure

Forces and motion	<ul style="list-style-type: none"> Distance and displacement Speed Velocity The distance-time relationship Acceleration 	
Forces, acceleration and Newton's Laws of motion	<ul style="list-style-type: none"> Newton's First Law Newton's Second Law Required practical – investigating the effect of varying the force on the acceleration of an object. Newton's Third Law 	
Forces and braking	<ul style="list-style-type: none"> Stopping distance Reaction time Factors affecting braking distance 	
Momentum (HT only)	<ul style="list-style-type: none"> Momentum is a property of moving objects Conservation of momentum 	<ul style="list-style-type: none"> Changes in momentum
P6 Waves	Trilogy and Triple	Triple only
Waves in air, fluids and solids	<ul style="list-style-type: none"> Transverse and longitudinal waves Properties of waves Required practical Ripple tank 	<ul style="list-style-type: none"> Reflection of waves – required practical reflection of light on different surfaces. Sound waves Waves for detection and exploration
Electromagnetic waves	<ul style="list-style-type: none"> Types of EM waves Properties of EM waves Use and application of EM waves 	<ul style="list-style-type: none"> Lenses Visible Light
Black body radiation		<ul style="list-style-type: none"> Emission and absorption of infrared radiation Perfect black bodies and radiation
P7 Magnetism and electromagnetism	Trilogy and Triple	Triple only
Permanent and induced magnetism, magnetic forces and fields	<ul style="list-style-type: none"> Poles of a magnet Magnetic fields 	
The motor effect	<ul style="list-style-type: none"> Electromagnetism Fleming's Left Hand Rule (HT) Eclectic motors (HT) 	<ul style="list-style-type: none"> Loudspeakers
Induced potential, transformers and the National Grid		<ul style="list-style-type: none"> Induced potential Uses of the generator effect Microphones Transformers
P8 Space Physics	Trilogy and Triple	Triple only
Solar system; stability of orbital moons; satellites		<ul style="list-style-type: none"> Our solar system The life cycle of a star Orbital motion, natural and artificial satellites Red Shift

Psychology		
Paper 1: Cognition and behaviour		
Memory	Processes of memory: encoding (input) storage and retrieval (output)	Different types of memory: episodic memory, semantic memory and procedural memory. How memories are encoded and stored.
	Structures of memory	The multi-store model of memory: sensory, short term and long term. Features of each store: coding, capacity, duration.

		Primacy and recency effects in recall: the effects of serial position. Murdock's serial position curve study.
	Memory as an active process	The Theory of Reconstructive Memory, including the concept of 'effort after meaning'. Bartlett's War of the Ghosts study. Factors affecting the accuracy of memory, including interference, context and false memories.
Perception	Sensation and perception	The difference between sensation and perception.
	Visual cues and constancies	Monocular depth cues: height in plane, relative size, occlusion and linear perspective. Binocular depth cues: retinal disparity, convergence.
	Gibson's direct theory of perception – the influence of nature	The real world presents sufficient information for direct perception without inference. Role of motion parallax in everyday perception.
	Visual illusions	Explanations for visual illusions: ambiguity, misinterpreted depth cues, fiction, size constancy. Examples of visual illusions: the Ponzo, the Müller-Lyer, Rubin's vase, the Ames Room, the Kanizsa triangle and the Necker cube.
	Gregory's constructivist theory of perception – the influence of nurture	Perceptual set and the effects of the following factors affecting perception: culture, motivation, emotion, expectation. The Gilchrist and Nesberg study of motivation and the Bruner and Minturn study of perceptual set.
	Factors affecting perception	Perceptual set and the effects of the following factors affecting perception: culture, motivation, emotion, expectation. The Gilchrist and Nesberg study of motivation and the Bruner and Minturn study of perceptual set.
Cognitive Development	Early brain development	A basic knowledge of brain development, from simple neural structures in the womb, of brain stem, thalamus, cerebellum and cortex, reflecting the development of autonomic functions, sensory processing, movement and cognition. The roles of nature and nurture.
	Piaget's stage theory and the development of intelligence The role of Piaget's theory in education	Piaget's Theory of Cognitive Development including concepts of assimilation and accommodation. The four stages of development: sensorimotor, pre-operational, concrete operational and formal operational. Application of these stages in education. Reduction of egocentricity, development of conservation. McGarrigle and Donaldson's 'naughty teddy study'; Hughes' 'policeman doll study'.
	The effects of learning on development	Dweck's Mindset Theory of learning: fixed mindset and growth mindset. The role of praise and self-efficacy beliefs in learning. Learning styles including verbalisers and visualisers. Willingham's Learning Theory and his criticism of learning styles.
Research methods	Formulation of testable hypotheses	Null hypothesis and alternative hypothesis
	Types of variable	Independent variable, dependent variable, extraneous variables.
	Sampling methods	Target populations, samples and sampling methods and how to select samples using these methods: • random • opportunity • systematic • stratified. Strengths and weaknesses of each sampling method. Understanding principles of sampling as applied to scientific data.
	Designing research	Quantitative and qualitative methods: • The experimental method (experimental designs, independent groups, repeated measures, matched pairs, including strengths and weaknesses of each experimental design)

		<ul style="list-style-type: none"> • Laboratory experiments • Field and natural experiments • Interviews • Questionnaires • Case studies • Observation studies (including categories of behaviour and inter-observer reliability). <p>Strengths and weaknesses of each research method and types of research for which they are suitable.</p>
	Correlation	An understanding of association between two variables and the use of scatter diagrams to show possible correlational relationships. The strengths and weaknesses of correlations. Computation of formulae is not required.
	Research procedures	The use of standardised procedures, instructions to participants, randomisation, allocation to conditions, counterbalancing and extraneous variables (including explaining the effect of extraneous variables and how to control for them).
	Planning and conducting research	How research should be planned, taking into consideration the reliability and/or validity of: <ul style="list-style-type: none"> • Sampling methods • Experimental designs • Quantitative and qualitative methods.
	Ethical considerations	<ul style="list-style-type: none"> • Ethical issues in psychological research as outlined in the British Psychological Society guidelines. • Ways of dealing with each of these issues.
	Data handling	<ul style="list-style-type: none"> • The difference between quantitative and qualitative data. • The difference between primary and secondary data. • Computation - Recognise and use expressions in decimal and standard form: use ratios, fractions and percentages, estimate results, find arithmetic means and use an appropriate number of significant figures. • Descriptive statistics - Understand and calculate mean, median, mode and range. • Construct and interpret frequency tables and diagrams, bar charts, histograms and scatter diagrams for correlation. • The characteristics of normal distribution.

Paper 2: Social context and behaviour

Social influence	Conformity	<ul style="list-style-type: none"> • Identification and explanation of how social factors (group size, anonymity and task difficulty) and dispositional factors (personality, expertise) affect conformity to majority influence. • Asch's study of conformity.
	Obedience	<ul style="list-style-type: none"> • Milgram's Agency theory of social factors affecting obedience including agency, authority, culture and proximity. • Explanation of dispositional factors affecting obedience including Adorno's theory of the authoritarian personality.
	Prosocial behaviour	<p>Bystander behaviour: identification and explanation of how social factors (presence of others and the cost of helping) and dispositional factors (similarity to victim and expertise) affect bystander intervention.</p> <ul style="list-style-type: none"> • Piliavin's subway study
	Crowd and collective behaviour	Prosocial and antisocial behaviour in crowds: identification and explanation of how social factors (social loafing, deindividuation and culture) and dispositional factors (personality and morality) affect collective behaviour.

Language, thought and communication	<p>The possible relationship between language and thought.</p> <p>The effect of language and thought on our view of the world</p>	<ul style="list-style-type: none"> • Piaget's theory: language depends on thought. • The Sapir-Whorf hypothesis: thinking depends on language. • Variation in recall of events and recognition of colours, e.g. in Native American cultures.
	Differences between human and animal communication	<ul style="list-style-type: none"> • Limited functions of animal communication (survival, reproduction, territory, food). • Von Frisch's bee study. • Properties of human communication not present in animal communication, e.g. plan ahead and discuss future events.
	Non-verbal communication	<ul style="list-style-type: none"> • Definitions of non-verbal communication and verbal communication. • Functions of eye contact including regulating flow of conversation, signaling attraction and expressing emotion. • Body language including open and closed posture, postural echo and touch. • Personal space including cultural, status and gender differences.
	Explanations of non-verbal behaviour	<ul style="list-style-type: none"> • Darwin's evolutionary theory of non-verbal communication as evolved and adaptive. • Evidence that non-verbal behaviour is innate, e.g. in neonates and the sensory deprived. • Evidence that non-verbal behaviour is learned. Yuki's study of emoticons.
Brain and neuropsychology	Structure and function of the nervous system	<ul style="list-style-type: none"> • The divisions of the human nervous system: central and peripheral (somatic and autonomic), basic functions of these divisions. • The autonomic nervous system and the fight or flight response. The James-Lange theory of emotion.
	Neuron structure and function	<ul style="list-style-type: none"> • Sensory, relay and motor neurons. Synaptic transmission: release and reuptake of neurotransmitters. Excitation and inhibition. An understanding of how these processes interact. • Hebb's theory of learning and neuronal growth.
	Structure and function of the brain	<ul style="list-style-type: none"> • Brain structure: frontal lobe, temporal lobe, parietal lobe, occipital lobe and cerebellum. • Basic function of these structures. • Localisation of function in the brain: motor, somatosensory, visual, auditory and language areas. • Penfield's study of the interpretive cortex.
	An introduction to neuropsychology	<ul style="list-style-type: none"> • Cognitive neuroscience: how the structure and function of the brain relate to behaviour and cognition. • The use of scanning techniques to identify brain functioning: CT, PET and fMRI scans. • Tulving's 'gold' memory study. • A basic understanding of how neurological damage, e.g. stroke or injury can affect motor abilities and behaviour.
Psychological problems	<p>An introduction to mental health.</p> <p>How the incidence of significant mental health problems changes over time</p>	<ul style="list-style-type: none"> • Characteristics of mental health, e.g. positive engagement with society, effective coping with challenges. • Cultural variations in beliefs about mental health problems. • Increased challenges of modern living, e.g. isolation. • Increased recognition of the nature of mental health problems and lessening of social stigma.
	Effects of significant mental health problems on individuals and society	<ul style="list-style-type: none"> • Individual effects, e.g. damage to relationships, difficulties coping with day to day life, negative impact on physical wellbeing.

		<ul style="list-style-type: none"> • Social effects, e.g. need for more social care, increased crime rates, implications for the economy.
	Characteristics of clinical depression	<ul style="list-style-type: none"> • Differences between unipolar depression, bipolar depression and sadness. • The use of International Classification of Diseases in diagnosing unipolar depression: number and severity of symptoms including low mood, reduced energy levels, changes in sleep patterns and appetite levels, decrease in self-confidence.
	Theories of depression Interventions or therapies for depression	<ul style="list-style-type: none"> • Biological explanation (influence of nature): imbalance of neurotransmitters, e.g. serotonin in the brain. • Psychological explanation (influence of nurture): negative schemas and attributions. • Use of antidepressant medications. • Cognitive behaviour therapy (CBT). • How these improve mental health, reductionist and holistic perspectives. • Wiles' study of the effectiveness of CBT.
	Characteristics of addiction	<ul style="list-style-type: none"> • The difference between addiction/dependence and substance misuse/abuse. • The use of International Classification of Diseases in diagnosing addiction (dependence syndrome), including a strong desire to use substance(s) despite harmful consequences, difficulty in controlling use, a higher priority given to the substance(s) than to other activities or obligations.
	Theories of addiction Interventions or therapies for addiction	<ul style="list-style-type: none"> • Biological explanation (influence of nature): hereditary factors/genetic vulnerability. Kaij's twin study of alcohol abuse. • Psychological explanation (influence of nurture): Peer influence. • Aversion therapy. • Self-management programmes, e.g. self-help groups, 12 step recovery programmes. • How these improve mental health, reductionist and holistic perspectives.

French		
Below are the topics that are covered in GCSE French. Students need to be able to recognise the vocabulary from the topic when listening and reading, and also be able to use it accurately when speaking and writing.		
Identity and culture	Local, national, international and global areas of interest	Current and future study and employment
<ul style="list-style-type: none"> • Me, my family and friends • Technology in everyday life • Free time activities • Customs and festivals in French-speaking countries/communities 	<ul style="list-style-type: none"> • Home, town, neighbourhood and region • Social issues • Global issues • Travel and tourism 	<ul style="list-style-type: none"> • My studies • Life at school/college • Education post-16 • Jobs, career choices and ambitions

French	
In addition to these, students need to demonstrate that they can recognise and use a range of grammar points successfully. The grammar topics are:	
All students	
Nouns	gender
	singular and plural forms
Articles	definite

	indefinite
	partitive
	<i>de</i> after negatives
Adjectives	agreement
	position
	comparative
	superlative
	demonstrative (<i>ce, cet, cette, ces</i>)
	indefinite (<i>chaque, quelque</i>)
	possessive
	interrogative (<i>quel, quelle</i>)
Adverbs	comparative
	superlative
	regular
	interrogative (<i>comment, quand</i>)
	time and place (<i>aujourd'hui, demain, ici, là-bas</i>)
	common adverbial phrases
Qualifiers/intensifiers	<i>très, assez, beaucoup, peu, trop</i>
Pronouns	personal: all subjects, including <i>on</i>
	reflexive
	relative: <i>qui</i>
	relative: <i>que</i>
	object: direct and indirect
	position and order of object pronouns
	disjunctive/emphatic (<i>moi, toi etc.</i>)
	demonstrative (<i>ça, cela</i>)
	indefinite (<i>quelqu'un</i>)
	interrogative (<i>qui, que</i>)
	use of <i>y, en</i>
Verbs	regular - er
	regular -ir
	regular -re
	irregular
	reflexive
	negative forms
	interrogative forms
	modes of address: <i>tu, vous</i>
	impersonal verbs (<i>il faut</i>)
	verbs followed by an infinitive
	Tenses:
	present tense
	perfect
	imperfect: <i>avoir, être and faire</i>
	other common verbs in the imperfect tense
	immediate future
	future
	conditional: <i>vouloir</i> and <i>aimer</i>
	pluperfect
	passive voice: present tense
	imperative

	present participle
Prepositions	<i>eg. à, au à l', aux; de, du, de la, de l', de la, des; après; avant; chez; contre; dans; depuis; derrière; devant; entre; pendant; pour; sans; sur; sous; vers</i> <i>en face de; à côté de etc...</i>
Conjunctions	<i>eg. car; donc; ensuite; et; mais; ou; ou bien; puis</i> <i>comme; lorsque; parce que; puisque; quand; que; si</i>
Number, quantity, dates and time	including <i>depuis</i> + present tense

Higher Tier Students: additional grammar topics	
Adjectives	comparative and superlative, including <i>meilleur, pire</i>
Adverbs	comparative and superlative, including <i>mieux, le mieux</i>
Pronouns	use of <i>y, en</i>
	relative: <i>que</i>
	relative: <i>dont</i>
	object: direct and indirect
	position and order of object pronouns
	demonstrative: <i>celui</i>
	possessive: <i>le mien</i>
Verbs	Tenses:
	simple future
	imperfect
	conditional
	pluperfect
	passive voice: future, imperfect and perfect
	perfect infinitive
	present participle, including use after <i>en</i>
	subjunctive mood: present, in commonly used expressions
Time	use of <i>depuis</i> with imperfect tense

Geography: Paper 1		
Hazardous Earth	Development Dynamics	Challenges of an Urbanising World
<ul style="list-style-type: none"> How winds, air pressure and ocean currents (Labrador/Gulf Stream) regulate Earth's temperature. What causes the ITCZ, "movement" of the ITCZ and how it affects rainfall in West Africa. Global circulation patterns, hadley cells & how to interpret climate graphs. Climate change theories (eruption, asteroid, orbital & sunspots), studying past climates (tree rings, ice cores, historical sources) Climate change/global warming causes & impacts. What are cyclones, formation of cyclones, how they're measured. 	<ul style="list-style-type: none"> Measuring development & development indicators, Human Development Index Interpreting population pyramids, development factors affecting populations (women's health & education) Global inequality, why there's a North-South divide, how development is changing (NIC, RIC, BRIC countries) Physical, social & political barriers to development: Malawi (Landlocked, pollution, trade, cash crops, WTO) Why are some countries poor? Rostow's Model: Five Stages of Economic Development. Frank's Dependency Theory: how the developing 'periphery' (LICs) 	<ul style="list-style-type: none"> Past, present & future trends of urbanisation Explaining why the world is becoming more urbanised What a megacity, world city & primate city (urban primacy) is. What makes a city a world city'. Net growth & causes of net growth. Causes of migration: rural-urban in Mumbai, knowledge & international migration in other cities and population decline (Detroit) How and why informal & formal economies differ in developed (New York), emerging (New Delhi) & developing (Kampala) cities. New York/ Mumbai: How and why suburbanisation, counter-

<ul style="list-style-type: none"> • Stages of cyclone formation, where they develop and why. • Cyclone Aila: causes, SEE effects and responses. • Hurricane Katrina, causes SEE effects and responses. Why was it more severe than expected? • Warning systems Bangladesh and USA. • Layers of the Earth, differences between the layers & differences between oceanic & continental crust • Convection currents, radioactive decay, formation of Earth's magnetic field • Plate boundaries (convergent, divergent, conservative & collision) • Features of volcanoes, volcanic hazards & primary and secondary effects of volcanoes. • Earthquake causes, how they're measured, primary & secondary effects. • Earthquakes in developed and developing countries: Haiti, Japan 	<ul style="list-style-type: none"> • depend on the developed 'core' (HICs). • How globalisation benefits different countries & effects of Foreign Direct Investment (FDI) • Clark-Fisher Model: how employment structure changes with development • Impacts/benefits of globalisation & industrialisation in India • Case Study: India as an emerging country • Understanding India's significance socially, politically, environmentally & culturally. • Why rapid globalisation is happening in India, operation & impact of TNC's e.g. BT • Economic, environmental and social change • How top-down and bottom-up development is helping India (Narmada River Project & Biogas by ASTRA). • India's next steps: challenges ahead. 	<ul style="list-style-type: none"> • urbanisation & re-urbanisation took place • How urban land use changes in cities & why (New York/ Mumbai) • Case study: Mumbai as a megacity in an emerging country • Mumbai's site & situation, city structure and connections. Mumbai's spatial growth. • Mumbai's rapid growth causes: rural-urban migration and natural increase. • Inequality in Mumbai, reasons for variations in quality of life. • Challenges facing Mumbai caused by population growth. Social & environmental issues. • Opportunities for Mumbai's population • Sustainable development in Mumbai. What sustainability is. • Top-down development • Bottom-up development

Geography: Paper 2		
UK's Evolving Physical Landscape	UK's Evolving Human Landscape	Geographical Investigations
<ul style="list-style-type: none"> • How geology (rock type, strata); tectonics (uplift, fault scarps); and glaciation (glaciers) created/changed UK's upland landscapes. • Igneous, Metamorphic and Sedimentary rock. How they influence landscapes & relief. • Processes affecting upland (Lake District) and lowland (Herefordshire) landscapes. • How people affect the landscape through agriculture, forestry and settlements • Difference between hard and soft rock coasts. Concordant & discordant coastlines. • Headland/hard rock erosion. (Caves, arches, stacks & stumps) • Waves: how they're caused and difference between constructive & destructive waves. • Types of erosion (solution, attrition, hydraulic action & abrasion) 	<ul style="list-style-type: none"> • UK's urban core: population density of the UK, why it is different around the country • UK's rural periphery: demographics of rural periphery areas • The gap between urban and rural development: ways to reduce the gap • Causes of population growth: net immigration & rising birth rate. Impacts of immigration • Why the 'old economy' declined (primary and secondary sectors) in Dinnington • Why the 'new knowledge economy' rose (tertiary and quaternary sectors) in Canary Wharf • Impacts of TNCs, globalisation, privatisation and FDI in the UK. • Case study: London as a major UK city 	<ul style="list-style-type: none"> • River fieldwork • Rural fieldwork • Primary and secondary sources of data. How primary data was collected. • Sampling strategies used • How data was presented (graphs, charts, diagrams, sketches) • Accuracy and reliability of primary and secondary data collection (why/why not reliable?) • Evaluation of fieldwork: were the right sites chosen? Good methods of data collection? What could have affected results? Reasons for any anomalous data/results • Conclusion & results presentation and analysis

<ul style="list-style-type: none"> • Deposition process & landforms: beaches and how longshore drift creates spits, bars etc. • Human impacts on coastal landscapes (development, housing, industry & coastal management) • Coastal flooding: causes (storm surges & sea level rise) & risks to people and property (2014 Storms) • Coastal management: hard and soft engineering. (Christchurch Bay) • Upper course: erosion & transportation, waterfall formation, weathering & mass movement • Middle course: meander & ox bow lake formation. How valley shape changes. • Lower course: landforms (levees, mudflats, valley shape), Bradshaw Model & river long profile • Interpreting storm hydrographs, what human & physical factors affect their shape • Sheffield floods '07: human & physical causes, SEE impacts and responses • Increasing risks of flooding (Somerset), physical and human causes • Managing flood risks: hard and soft engineering. Advantages and disadvantages 	<ul style="list-style-type: none"> • Location, site & situation, connectivity (with UK and world) and city structure. • Causes of migration in London. Impacts on 3 suburbs: Newham (low income), Lambeth (middle income) and Richmond upon Thames (high income). • Inequalities within London, causes and impacts (comparing Newham & Richmond upon Thames) • London's decline (suburbanisation, decentralisation, dock closures) • Regeneration (re-urbanisation). rebranding (Olympics 2012), opportunities • Improving London (sustainability problems/challenges and solutions) • London's rural periphery (Terling, Essex) accessibility and dependency on London. • Social and economic change in rural areas (Devon) and pressures as a result (on housing, leisure and recreation) • Challenges (rural deprivation) and opportunities for development in Cornwall 	
---	---	--

Geography: Paper 3		
People and the Biosphere	Forests Under Threat	Consuming Energy Resources
<ul style="list-style-type: none"> • What are the world's major biomes and where are they found? • How temperature, latitude & elevation affect biome location • How precipitation (rainfall) affects biome location • Atmospheric circulation (hadley cells, ferrel cells & polar cells) and how they affect air pressure & rainfall • How sunshine hours affects biomes • Local factors affecting biomes: rock & soil type, water availability & drainage, altitude. 	<ul style="list-style-type: none"> • How abiotic & biotic factors influence the forest ecosystem • How plants and animals are adapted to their climate • The nutrient cycle in the Rainforest and Taiga • Food webs and biodiversity in the Rainforest and Taiga • Causes of deforestation in the Rainforest and Taiga (BR163, Athabasca Tar Sands) • Why climate change is an indirect threat to the Rainforest How acid rain, forest fires, disease and pests result in a loss of biodiversity in the Taiga 	<ul style="list-style-type: none"> • The categories and examples of different types of energy: non-renewable; renewable and recyclable • How extracting energy through mining and drilling can have negative impacts on the environment • To explain how the global distribution of energy is influenced by geology, accessibility and climate. • To describe the global pattern of energy consumption and explain why there are differences

<ul style="list-style-type: none"> • How soil type influences type of trees in UK • Biotic & abiotic factors of ecosystems & biomes • Interpreting climate graphs • What goods and services ecosystems (e.g. tropical rainforest) provide • Sustainable use: how the Efe tribe use the rainforest sustainably. • How ecosystems are being exploited, role of TNCs. • Main causes of deforestation in the rainforest in LICs (ranching, palm oil, farming, mining, logging) • Consequences of exploiting the rainforest; future of the rainforest. 	<ul style="list-style-type: none"> • The cost and benefits of global approaches to conserving the biosphere (CITES & REDD) • Sustainable forestry management (Kilum Ijim & Juma) • The costs and benefits of national parks (Buffalo, Canada) • Conflicting views on the use of different biomes 	<p>between developed, emerging and developing places.</p> <ul style="list-style-type: none"> • Describe the variations in patterns of oil reserves • Explain why the global consumption of oil is increasing (rising GDP, rapid industrialisation) • Explain why oil supply is affected by political relations (conflicts & diplomatic relations) as well as economic factors such as recession or under supply.

History: Paper 1 Medicine in Britain, c1250–present		
c1250–c1500: Medicine in medieval England	c1500–c1700: The Medical Renaissance in England –	c1700–c1900: Medicine in eighteenth- and nineteenth-century Britain
<ul style="list-style-type: none"> • Supernatural and religious explanations of the cause of disease. • Rational explanations: the Theory of the Four Humours and the miasma theory; the continuing influence in England of Hippocrates and Galen. • Approaches to prevention and treatment and their connection with ideas about disease and illness: religious actions, bloodletting and purging, purifying the air, and the use of remedies. • New and traditional approaches to hospital care in the thirteenth century. The role of the physician, apothecary and barber surgeon in treatment and care provided within the community and in hospitals, c1250–1500. • Dealing with the Black Death, 1348–49; approaches to treatment and attempts to prevent its spread. 	<ul style="list-style-type: none"> • Continuity and change in explanations of the cause of disease and illness. • A scientific approach, including the work of Thomas Sydenham in improving diagnosis. • The influence of the printing press and the work of the Royal Society on the transmission of ideas. • Continuity in approaches to prevention, treatment and care in the community and in hospitals. • Change in care and treatment: improvements in medical training and the influence in England of the work of Vesalius. • Key individual: William Harvey and the discovery of the circulation of the blood. • Dealing with the Great Plague in London, 1665: approaches to treatment and attempts to prevent its spread. 	<ul style="list-style-type: none"> • Continuity and change in explanations of the cause of disease and illness. • The influence in Britain of Pasteur’s Germ Theory and Koch’s work on microbes. • The extent of change in care and treatment: improvements in hospital care and the influence of Nightingale. The impact of anaesthetics and antiseptics on surgery. • New approaches to prevention: the development and use of vaccinations and the Public Health Act 1875. • Key individual: Jenner and the development of vaccination. • Fighting Cholera in London, 1854; attempts to prevent its spread; the significance of Snow and the Broad Street pump.
c1900–present: Medicine in modern Britain	British sector of the Western Front, 1914–18: injuries, treatment and the trenches	

<ul style="list-style-type: none"> • Advances in understanding the causes of illness and disease: the influence of genetic and lifestyle factors on health. • Improvements in diagnosis: the impact of the availability of blood tests, scans and monitors. • The extent of change in care and treatment. The impact of the NHS and science and technology: improved access to care; advances in medicines, including magic bullets and antibiotics; high-tech medical and surgical treatment in hospitals. • New approaches to prevention: mass vaccinations and government lifestyle campaigns • Key individuals: Fleming, Florey and Chain's development of penicillin. • The fight against lung cancer in the twenty-first century: the use of science and technology in diagnosis and treatment; government action. 	<ul style="list-style-type: none"> • The context of the British sector of Western Front and the theatre of war in Flanders and northern France: the Ypres salient, the Somme, Arras and Cambrai. The trench system - its construction and organisation, including frontline and support trenches. • The use of mines at Hill 60 near Ypres and the expansion of tunnels, caves and quarries at Arras. Significance for medical treatment of the nature of the terrain and problems of the transport and communications infrastructure. • Conditions requiring medical treatment on the Western Front, including the problems of ill health arising from the trench environment. The nature of wounds from rifles and explosives. The problem of shrapnel, wound infection and increased numbers of head injuries. The effects of gas attacks. • The work of the RAMC and FANY. The system of transport: stretcher bearers, horse and motor ambulances. The stages of treatment areas: aid post and field ambulance, dressing station, casualty clearing station, base hospital. The underground hospital at Arras. • The significance of the Western Front for experiments in surgery and medicine: new techniques in the treatment of wounds and infection, the Thomas splint, the use of mobile x-ray units, the creation of a blood bank for the Battle of Cambrai. • The historical context of medicine in the early twentieth century: the understanding of infection and moves towards aseptic surgery; the development of x-rays; blood transfusions and developments in the storage of blood. • Knowledge of national sources relevant to the period and issue, e.g. army records, national newspapers, government reports, medical articles. • Knowledge of local sources relevant to the period and issue, e.g. personal accounts, photographs, hospital records, army statistics. • Recognition of the strengths and weaknesses of different types of source for specific enquiries. • Framing of questions relevant to the pursuit of a specific enquiry. • Selection of appropriate sources for specific investigations.

History: Paper 2 The Anglo-Saxon and Norman England, c1060–88		
1060–66 Anglo-Saxon England and the Norman Conquest	1066–87 Key topic 2: William I in power: securing the kingdom	1066–88 Norman England
<ul style="list-style-type: none"> • Monarchy and government: the power of the English monarchy; earldoms, local government and the legal system. • The economy and social system: towns and villages; the influence of the Church 	<ul style="list-style-type: none"> • The submission of the earls, 1066 • Rewarding followings and establishing control on the borderlands through the use of earls • The Marcher earldoms 	<ul style="list-style-type: none"> • The feudal hierarchy: the role and importance of tenants-in-chief and knights; the nature of feudalism (landholding, homage, knight service, labour service); forfeiture • The Church in England: its role in society and relationship to

<ul style="list-style-type: none"> • The house of Godwin: Harold Godwinson's succession as Earl of Wessex; the power of the Godwins • Harold Godwinson's embassy to Normandy • The rising against Tostig and his exile • The death of Edward the Confessor • The motives and claims of William of Normandy, Harald Hardrada and Edgar • The Witan and the coronation and reign of Godwinson • Reasons for, and significance of, the outcome of the Battles of Fulford and Stamford Bridge • The Battle of Hastings • Reasons for William's victory, including the leadership skills of Harold and William, Norman and English troops and tactics 	<ul style="list-style-type: none"> • Reasons for the building of castles; their key features and importance • The revolts of Earls Edwin and Morcar in 1068 • Edgar the Aethling and the rebellions in the North, 1069 • Hereward the Wake and rebellion at Ely, 1070–71 • The reasons for and features of the Harrying of the North, 1069–70 • Its immediate and long-term impact, 1069–1087 • Changes in landownership from Anglo-Saxon to Norman, 1066–87 • How William I maintained royal power • Reasons for and features of the revolt • The defeat of the revolt and its effects 	<ul style="list-style-type: none"> • government, including the roles of Stigand and Lanfranc; the Normanisation and reform of the Church in the reign of William I • The extent of change to Anglo-Saxon society and economy • Changes to government after the Conquest: centralised power and the limited use of earls under William I; the role of regents • The office of the sheriff and the demesne; introduction and significance of the 'forest' • Domesday Book and its significance for Norman government and finance • The culture and language of the Norman aristocracy • The career and significance of Bishop Odo • Character and personality of William I and his relations with Robert • Robert and revolt in Normandy, 1077–80 • William's death and the disputed succession • William Rufus and the defeat of Robert and Odo
---	---	---

History: Paper 3: Modern Depth Study: Weimar and Nazi Germany, 1918-1939	
1918–29 The Weimar Republic	1919-33 Hitler's rise to power
<ul style="list-style-type: none"> • The legacy of the First World War. The abdication of the Kaiser, the armistice and revolution, 1918–19. • The setting up of the Weimar Republic. The strengths and weaknesses of the new Constitution. • Reasons for the early unpopularity of the Republic, including the 'stab in the back' theory and the key terms of the Treaty of Versailles. • Challenges to the Republic from Left and Right: Spartacists, Freikorps, the Kapp Putsch. • The challenges of 1923: hyperinflation; the reasons for, and effects of, the French occupation of the Ruhr. • Reasons for economic recovery, including the work of Stresemann, the Rentenmark, the Dawes and Young Plans and American loans and investment. • The impact on domestic policies of Stresemann's achievements abroad: the Locarno Pact, joining the League of Nations and the Kellogg-Briand Pact. • Changes in the standard of living, including wages, housing, unemployment insurance. • Changes in the position of women in work, politics and leisure. • Cultural changes: developments in architecture, art and the cinema. 	<ul style="list-style-type: none"> • Hitler's early career: joining the German Workers' Party and setting up the Nazi Party, 1919–20. • The early growth and features of the Party. The Twenty-Five Point Programme. The role of the SA. • The reasons for, events and consequences of the Munich Putsch. • Reasons for limited support for the Nazi Party, 1924–28. Party reorganisation and <i>Mein Kampf</i>. The Bamberg Conference of 1926. • The growth of unemployment – its causes and impact. The failure of successive Weimar governments to deal with unemployment from 1929 to January 1933. The growth of support for the Communist Party. • Reasons for the growth in support for the Nazi Party, including the appeal of Hitler and the Nazis, the effects of propaganda and the work of the SA. • Political developments in 1932. The roles of Hindenburg, Brüning, von Papen and von Schleicher. • The part played by Hindenburg and von Papen in Hitler becoming Chancellor in 1933.

Nazi control and dictatorship	1933-39 Life in Nazi Germany
<ul style="list-style-type: none"> • The Reichstag Fire. The Enabling Act and the banning of other parties and trade unions. • The threat from Röhm and the SA, the Night of the Long Knives and the death of von Hindenburg. Hitler becomes Führer, the army and oath of allegiance. • The role of the Gestapo, the SS, the SD and concentration camps. • Nazi control of the legal system, judges and law courts. • Nazi policies towards the Catholic and Protestant Churches, including the Reich Church and the Concordat. • Goebbels and the Ministry of Propaganda: censorship, Nazi use of media, rallies and sport, including the Berlin Olympics of 1936. • Nazi control of culture and the arts, including art, architecture, literature and film. • The extent of support for the Nazi regime. • Opposition from the Churches, including the role of Pastor Niemöller. • Opposition from the young, including the Swing Youth and the Edelweiss Pirates. 	<ul style="list-style-type: none"> • Nazi views on women and the family. • Nazi policies towards women, including marriage and family, employment and appearance. • Nazi aims and policies towards the young. The Hitler Youth and the League of German Maidens. • Nazi control of the young through education, including the curriculum and teachers. • Nazi policies to reduce unemployment, including labour service, autobahns, rearmament and invisible unemployment. • Changes in the standard of living, especially of German workers. The Labour Front, Strength Through Joy, Beauty of Labour. • Nazi racial beliefs and policies and the treatment of minorities: Slavs, 'gypsies', homosexuals and those with disabilities. • The persecution of the Jews, including the boycott of Jewish shops and businesses (1933), the Nuremberg Laws and Kristallnacht.

Philosophy and Ethics: Christian Beliefs and Practices		
Beliefs	Practices: <i>Worship and festivals:</i> Different forms of worship and their significance	Good and Evil
<ul style="list-style-type: none"> • The nature of God: God as omnipotent, loving and just and the problem of evil. • The oneness of God and the Trinity: Father, Son and Holy Spirit. • Different Christian beliefs about creation including the role of Word and Spirit (John 1:1-3 and Genesis 1:1-3). • Jesus Christ and Salvation: Beliefs and teaching about the incarnation and Jesus as the Son of God and the crucifixion. • Jesus Christ and Salvation: Beliefs and teaching about the resurrection and ascension and life after death • Jesus Christ and Salvation: Different Christian beliefs about the afterlife and their importance, including: 	<ul style="list-style-type: none"> • Liturgical, non-liturgical and informal, including the use of the Bible and private worship. Prayer and its significance, including Lord's Prayer and informal prayer. • The role and meaning of the sacraments: The meaning of sacrament, the sacrament of baptism and its significance for Christians; infant and believers baptism; different ways in which it is celebrated and different interpretations of its meaning. • The sacrament of Eucharist (Holy Communion) and its significance for Christians, including different ways in which it is celebrated and different interpretations of its meaning. • The role and importance of pilgrimage and celebrations 	<ul style="list-style-type: none"> • Different ideas about what makes an act 'wrong'? • Religious and ethical ideas about relative and absolute morality, conscience, virtues, sin. • Beliefs and attitudes about the causes of crime and the aims of punishment: justice, retribution, deterrence and reformation. • The treatment of criminals and the work of prison reformers and prison chaplains. • Varied Conservative and Liberal Christian responses to the Death Penalty, including interpretations of Christian teaching: Exodus 20:13, Matthew 5:38-39, 43-47. • Christian teachings about forgiveness, including interpretations of teachings: Matthew 18:21-22, Matthew 6: 14-15.

<p>resurrection and life after death: judgement, heaven and hell.</p> <ul style="list-style-type: none"> Jesus Christ and Salvation: Beliefs and teaching about sin, including original sin, the means of salvation, including, law, grace and Spirit, the role of Christ in salvation and atonement. 	<p>including: two contrasting examples of Christian pilgrimage: Lourdes and Iona. The celebrations of Christmas and Easter, including their importance for Christians in Great Britain today.</p> <ul style="list-style-type: none"> <i>The role of the church in the local and worldwide community:</i> The role of the Church in the local community, including food banks and street pastors. The place of mission, evangelism and Church growth. The importance of the worldwide church including: The work for reconciliation, how Christian church respond to persecution and the work of Christian Aid. 	<ul style="list-style-type: none"> Examples of forgiveness arising from personal beliefs (eg. Gee Walker). Philosophical perspectives on the origin of evil: Original Sin (free will) and 'soul-making' (Irenaeus and John Hick). Philosophical challenges posed by belief in God, free will and the existence of evil and suffering. The key concepts and their definitions for this unit.
--	--	---

Philosophy and Ethics: Islam Beliefs and Practices	
Beliefs	Practices: Worship
<ul style="list-style-type: none"> The six articles of faith in Sunni Islam and five roots of Ulul ad-Din in Shi'a Islam, including key similarities and differences. The oneness of God (Tawhid), Quran Surah 112 and the nature of God: omnipotence, beneficence, mercy, fairness and justice (Adalat in Shi'a Islam), including different ideas about God's relationship with the world: immanence and transcendence. Angels, their nature and role including Jibril and Mikar'il and predestination and human freedom and its relationship to the Day of Judgement. Life after Death (Akhirah), human responsibility and accountability, resurrection, heaven and hell. Authority: Prophet hood (Risalah) including the role and importance of Adam, Ibrahim and Muhammad. The six articles of faith in Sunni Islam and five roots of Ulul ad-Din in Shi'a Islam, including key similarities and differences. Authority: The Holy Books – Qur'an: revelation and authority, the Torah, the Psalms, the Gospel, the Scrolls of Abraham and their authority. The imamate in Shi'a Islam: its role and significance. 	<ul style="list-style-type: none"> Five Pillars of Sunni Islam and the Ten Obligatory Acts of Shi'a Islam (student should study the 5 pillars and jihad in both Sunni and Shi'a Islam and the additional duties of Shi'a Islam). Shahadah: Declaration of faith and its place in Muslim practice. Salah and its significance: how and why Muslims pray including times, directions, ablution (wudu), movements (rak'ahs) and recitations; salah in the home and mosque and elsewhere; Friday prayer (Jummah); key differences in practices of Salah in Sunni and Shi'a Islam, and different Muslim views about the importance of prayer. Duties and festivals: Sawm: the role and significance of fasting during the month of Ramadan including origins, duties, benefits of fasting, the exceptions and their reasons, and the Night of Power Duties and festivals: Zakah: The role and significance of the pilgrimage to Makkah including origins how hajj is performed, the actions pilgrims perform at sites including the Ka'aba at Makkah, Mina, Arafat, Muzdalifah and their significance. Duties and festivals: Jihad: Different understandings of jihad: the meaning and significance of great and lesser jihad, origins and conditions for the declaration of lesser jihad. Duties and festivals: Festivals and commemorations and their importance for Muslims in Great Britain today, including the origins and meaning of Id-ul-Adha, Id-ul-Fitr, Ashura.

Philosophy and Ethics: Component 1 Theme 1 - Issues of Relationships (Christian Denominations)		
	Sexual Relationships	Issues of Equality: Gender prejudice and discrimination
<ul style="list-style-type: none"> • Christian beliefs, attitudes and teachings about the nature and purpose of relationships in the twenty first century • The role of families and how Christianity encourages family units. The roles of women and men • The purpose of families, including: procreation, stability and the protection of children, educating children in a faith. • Contemporary family issues including: same-sex parents and polygamy • Marriage outside the religious tradition and cohabitation • The nature and purpose of marriage as expressed through the Christian marriage ceremonies and teachings: Mark 10:6-10 and the Church of England Synod • Varying Christian attitudes towards adultery, divorce and annulment and separation and re-marriage. Interpretations of Matthew 19:8-9, Mark 10:9 	<ul style="list-style-type: none"> • Christian teachings about the nature and purpose of sex • Christian teachings about the use of contraception including varied interpretations of Thomas Aquinas' Five Precepts • Diverse attitudes within and across Christian traditions towards same sex relationships, including varied interpretations of: Leviticus 18:22, 20:3 and 1 Timothy 1: 8-10 • Human sexuality including: heterosexual and homosexual relationships. 	<ul style="list-style-type: none"> • Diverse attitudes within Christianity toward the roles of women and men in worship and authority • Interpretations of teachings: 1 Timothy 2:11-12, Galatians 3:27-29 • Gender equality: Gender prejudice and discrimination including examples

Philosophy and Ethics: Component 1 Theme 3 - Issues of Good and Evil (Christian Denominations)		
Crime and Punishment	Forgiveness	Good, Evil and Suffering
<ul style="list-style-type: none"> • Religious and ethical responses: relative and absolute morality, conscience, virtues, sin • Beliefs and attitudes about the causes of crime and the aims of punishment: justice, retribution, deterrence and reformation • The treatment of criminals and the work of prison reformers and prison chaplains • Varied Christian responses to the Death Penalty, including interpretations of Christian teaching: Exodus 20:13, Matthew 5:38-39, 43-47 	<ul style="list-style-type: none"> • Christian teachings about forgiveness, including interpretations of teachings: Matthew 18:21-22, Matthew 6: 14-15 • Examples of forgiveness arising from personal beliefs. 	<ul style="list-style-type: none"> • Philosophical perspectives on the origin of evil: Original Sin (free will) and 'soul-making' • Philosophical challenges posed by belief in God and the existence of evil and suffering
		Key Concepts <ul style="list-style-type: none"> • good/evil • forgiveness • free will • justice • morality • punishment • sin • suffering

Philosophy and Ethics: Component 1 Theme 4 - Issues of Life and Death (Christian Denominations)		
The World	The Origin and Value of Human Life	Beliefs about Death and the Afterlife
<ul style="list-style-type: none"> Diverse Christian beliefs, teachings and attitudes about the accounts of the origin of the universe: Genesis 1 and 2 The relationship between Christian views and non-religious views of creation and the extent to which they conflict Christian beliefs, teachings and attitudes about dominion, stewardship, environmental responsibility, sustainability, and global citizenship: Genesis 1:28, Psalm 8:6 	<ul style="list-style-type: none"> Diverse Christian beliefs, teachings and attitudes toward the origin and sanctity of human life: Genesis 1:31, Jeremiah 1:5 Diverse Christian attitudes towards abortion and euthanasia Non-religious views about the origin and value of human life, including attitudes toward abortion and euthanasia 	<ul style="list-style-type: none"> Christian beliefs and teachings about life after death, including soul, judgement, heaven and hell: John 11:24-27, 1 Corinthians 15: 42-44 Diverse Christian beliefs about the after-life How Christian and non-religious funerals reflect beliefs about the after-life
		Key Concepts <ul style="list-style-type: none"> afterlife environmental sustainability euthanasia evolution abortion quality of life sanctity of life soul

Computer Science
<ul style="list-style-type: none"> 1.1 Systems Architecture – Architecture of the CPU, CPU Performance, Embedded Systems 1.2 Memory and Storage – Primary Storage, Secondary Storage, Units and Data Storage, Compression 1.3 Networks, Connections and Protocols – Networks and topologies, Wired and Wireless Networks, protocols and layers 1.4 Network Security – Threats to computer systems and networks, identifying and preventing vulnerabilities 1.5 Systems Software – Operating Systems, Utility Software 1.6 Ethical, Legal, Cultural & Environmental impacts of digital technology 2.1 Algorithms – computational thinking, designing, creating and refining algorithms, searching and sorting algorithms 2.2 Programming fundamental – programming fundamental, data types, additional programming techniques 2.3 Producing robust programs – defensive design, testing 2.4 Boolean Logic 2.5 Programming language and Integrated Development Environments – Language, IDE,

Food and Nutrition		
Food, Nutrition and Health	Food Science	Food Safety
<ul style="list-style-type: none"> Vitamins Minerals Diet and health 	<ul style="list-style-type: none"> Cooking and heat transfer Proteins: denaturation, coagulation, gluten, foams Carbohydrates: gelatinisation, Dextrinisation, Caramelisation Fats and oil: shortening, aeration, emulsification Raising agents 	<ul style="list-style-type: none"> Spoilage and contamination Micro-organisms and enzymes Bacteria Preparing, cooking and serving

Food Choice	Food Provenance	
<ul style="list-style-type: none"> • Influences • Religion • Dietary needs • Marketing and labelling • International cuisine 	<ul style="list-style-type: none"> • Environmental impact • Sustainability • Food production and processing 	

DT: Product Design		
Core Technical Principles (10% overall GCSE)	Specialist Technical Principles (40% overall GCSE)	Designing and Making Principles (NEA 50% and Exam)
<ul style="list-style-type: none"> • Energy generation and storage • New technologies • New materials • Systems approach to designing, • Mechanical devices • Materials and working properties 	<ul style="list-style-type: none"> • Selection of materials and components • Forces and stresses • Ecological and social footprint • Sources and origins • Using and working with materials • Stock forms, types and sizes • Scales of production • Specialist techniques and processes • Surface treatments and finishes 	<ul style="list-style-type: none"> • Investigation • Primary and Secondary data • Environmental, Social and Economic challenge • The work of others • Design strategies • Communication of design • Prototype development • Selection of materials and components • Tolerances • Materials management • Specialist tools and equipment • Specialist techniques and processes • Designing and making principles

Drama: Component 1		
Written Paper - Section A	Written Paper - Section B	Written Paper - Section C
<ul style="list-style-type: none"> • Theatre roles • Responsibilities • Terminology • Staging/stage space <p><i>Students will need to look at the theatre roles/responsibilities and terminology lists and staging configurations to remind themselves of this information.</i></p>	<ul style="list-style-type: none"> • Blood Brothers <p><i>Read over notes and any character work. Students will have a copy of the play in the exam so DO NOT NEED to learn quotes but knowing where useful sections are will help save time in the exam.</i></p>	<ul style="list-style-type: none"> • Live theatre <p><i>Students need to remember THE PRODUCTION, THE VENUE AND DATE. They must know in detail several KEY MOMENTS from the production they have seen. Revise 3 KEY MOMENTS and at least 2 ACTORS/CHARACTERS in detail linking to specific moments. *For Mocks students will write about a recorded piece.</i></p>
Time spent in the exam	Time spent in the exam	Time spent in the exam
5 minutes	60 minutes	40 minutes

Music
<p>The Concerto Through Time</p> <ul style="list-style-type: none"> • Baroque concerto • Classical concerto • Romantic Concerto <p>Rhythms of the World</p> <ul style="list-style-type: none"> • Indian Classical

Dance: Performance

Knowledge, understanding and skills

Physical skills and attributes:

- posture • alignment • balance • coordination • control • flexibility • mobility • strength • stamina • extension
- isolation

Technical skills:

- action content • dynamic content • spatial content • relationship content – for duet/trio performance only • timing content • rhythmic content • movement in a stylistically accurate way

Expressive skills:

- projection • focus • spatial awareness • facial expression • phrasing

For duet/trio performance only:

- musicality • sensitivity to other dancers • communication of choreographic intent, including mood(s), meaning(s), idea(s)

Mental skills and attributes (during performance):

- movement memory • commitment • concentration • confidence

Safe working practices (during performance):

- safe execution • appropriate dancewear, including: footwear, hairstyle, absence of jewellery

Mental skills and attributes (process):

- systematic repetition • mental rehearsal • rehearsal discipline • planning of rehearsal • response to feedback
- capacity to improve

Safe working practices (process):

- warming up • cooling down • nutrition • hydration

Dance: Choreography

Knowledge, understanding and skills for choreography:

- Action content:** • travel • turn • elevation • gesture
- stillness • use of different body parts
 - floor work • transfer of weight

- Dynamic content:** • fast/slow • sudden/sustained
- acceleration/deceleration • strong/light • direct/indirect
 - flowing/abrupt

- Spatial content:** • pathways • levels • directions • size of movement • patterns • spatial design

Critical appreciation of 6 professional set works:

- Features of production:** • staging/set eg projection, furniture, structures, backdrop, screens and features of these such as colour, texture, shape, decoration, materials • lighting eg colour, placement, direction, angles etc • properties eg size, shape, materials, how used etc
- **costume** (including footwear, masks, make-up and accessories): features such as colour, texture, material, flow, shape, line, weight, decoration and how they define character or gender, identify dancers, enhance or sculpt the body and enhance the action • dancers

Relationship content: • lead and follow • mirroring • action and reaction • accumulation • complement and contrast • counterpoint • contact • formations

Choreographic processes: • researching • improvising • generating • selecting • developing • structuring • refining and synthesising

Structuring devices and form: • binary • ternary • rondo • narrative • episodic • beginning/middle/end • unity • logical sequence • transitions

Choreographic devices: • motif and development • repetition • contrast • highlights • climax • manipulation of number • unison and canon

Aural settings (and how they affect choreographic outcomes): • song • instrumental • orchestral • spoken word • silence • natural sound • found sound • body percussion

Effects on choreographic outcomes: • mood and atmosphere • contrast and variety • structure • relationship to theme/idea

Performance environments: • proscenium arch • end stage • site-sensitive • in-the-round

Communication of choreographic intent: • mood(s) • meaning(s) • idea(s) • theme(s) • style/style fusion(s)

(number, gender) • aural settings eg song, instrumental, orchestral, spoken word, silence, natural sound, found sound, body percussion, style, structure and musical elements such as tone, pitch and rhythm • dance for camera eg placement, angle, proximity, special effects

Performance environments: • proscenium arch • end stage • site-sensitive • in-the-round

Choreographic content: • movement content as per the knowledge, skills and understanding for choreography specified in Choreography • structuring devices and • choreographic devices

Choreographic intent: • mood(s) • meaning(s) • idea(s) • theme(s) • style/style fusion(s)
