

unifrog

The Complete Destinations Platform

Make it easy for your students to find and apply for
the best courses and apprenticeships for them.

What we provide to students

“Unifrog provides a one-stop-shop for information that is often hard to find, allowing students and families to make better informed decisions about where to apply”

David Hawkins, Associate Director for International Education at Nemecek Bonas Macfarlane, formerly Head of College Counselling at the International School of Brussels and Head of Careers at Taunton School, UK

Unifrog is the one-stop-shop for destinations, allowing students to explore every university course, apprenticeship and college course in the UK plus other around the world opportunities such as European and US undergraduate courses

They can make applications using Unifrog and receive feedback from teachers along the way. This includes create their personal statement and CV, plus more!

Archaeology

The study of history through the excavation of sites and the analysis of physical remains.

[< Back](#)

🔍 In a nutshell

In a few words

Can you picture yourself exploring the tombs of kings or unearthing the next Staffordshire Hoard? Archaeology could be for you – but remember you'll probably spend your days working with more mundane matters. Archaeology blends history with science, to draw meaning from everyday objects to shine a light on past worlds using innovative techniques. You can specialise by period or take a more generalist route.

Study

You'll take modules like: analysis of artefacts, archaeological excavation, introduction to prehistory, rethinking archaeology: theory and interpretation, interpreting sites and landscapes.

Section 1

[Edit >](#)

Why do you want to study this subject?

I enjoy studying Chemistry because I feel it underpins how we as humans work and that is fascinating. Being able to study the chemical make-up of our bodies and what is happening to each of us, every second of every day would be amazing. Having read several articles on Chemistry I have come to understand the importance of in depth research and how much influence just one, well-executed study can have on the industry.

There is still so much to be explored about chemicals, both natural and man-made. The future of energy being one major concern that is prevalent in a lot of media and politics around the world. Knowing that the answer to all of our energy needs has inherently a chemical answer is exciting and one that I would love to be able to explore further.

771 of 1200 characters

 **Comment from Ms Young** on 1 November 2016 at 14:53

Good work! You should be more specific when talking about articles that you have read; can you name any? Try to flesh that part out a little.

Make sure you know where you are heading after this paragraph, it does sound like you could use the whole character limit just talking about how wonderful chemistry is. You need to ensure you bring in everything else that is important too.

How can Unifrog improve attainment?

Getting in

Overall Application success rate

9%

UK Application success rate

13%

Entry requirements A Level

A,A,B

Last year's successful applicants

84.8% of successful applicants did the same qualification types as you, and of these the typical results were:

A Level: AAB

Students can see clearly what grades they need to achieve at GCSE and A-level for certain courses. GCSEs are increasingly important with the new linear A-levels and no AS results.

It also helps ensure that students don't restrict themselves early because they are aware of subject and grade requirements.

How can Unifrog improve aspirations?

Unifrog gets students thinking about university early. It allows them explore courses that they may never have heard of before in a way that is relevant for them and they can absorb.

They will become familiar with Russell Group universities and Oxbridge colleges so that when they come to apply, the increased exposure will mean they are more likely to apply to the best universities for them.

The benefits of using Unifrog

Prepare for Ofsted

The Department for Education has directed Ofsted to give careers guidance higher priority in school inspections.

Statutory responsibility

Schools have a statutory responsibility to provide independent and impartial information on students' full range of options, including vocational routes such as apprenticeships.

Raise attainment

Good careers guidance motivates students to work hard towards their goals - thus raising attainment.

Reduce NEETs

Good careers guidance motivates students to work hard towards their goals - thus raising attainment.

Russell Group and Oxbridge Access

Graduates from Russell Group universities earn up to 16% more than graduates from other universities.

Gatsby Benchmarks

Unifrog is mapped against the Gatsby Benchmarks to help you deliver Outstanding Careers Guidance.

Ben Harding
Director Post 16 Studies
Allerton High Business
and Enterprise Specialist
School

“The impact Unifrog has had on our school and students has been fantastic; the unifying system is a one stop shop that has ensured students can search for opportunities and teachers can track and communicate with them more effectively.

We have also seen a marked improvement in the research students have been doing about opportunities, importantly they are making smarter and informed choices.”
